ARTICLE INFO

The charging interface LI-048-48 is the successor of LB-xxx for modular control panels M-SHEV. It is based upon the module size of M-SHEV modules for rail mounting. Presettings are for purpose of two 48 A switching power supply and 17 Ah lead batteries for 72h backup battery time in case of mains failure. Failures will be forwarded directly to M-SHEV (ZI-100)

The LI-048-48 is a part of the power supply EV-48, which is approved and certified according EN 12101-10. The M-SHEV is CE marked.

|-------------------------------|------------------------------|
| Matchcode | LI-048-48 |
| Article name | Charging interface LI-048-48 |
| Part number | ST4 3374 |
| Input voltage | 230 V AC |
| Output voltage | 24 V DC |
| Nominal current | 48 |
| Weight | 0.264 |
| Housing type | Plastic |
| Colour | Blue |
| Appliance class | I |
| Environment temperature range | -5 °C - 40 °C |
